

## ENGINEERS

by Jimmy Garthwaite

Pistons, valves and wheels and gears  
That's the life of engineers  
Thumping, chunking engines going  
Hissing steam and whistles blowing.

There's not a place I'd rather be  
Than working round machinery  
Listening to that clanking sound  
Watching all the wheels go round.

Can you learn this by heart? Make some  
words louder than others and some  
longer like hissssssssssing. Have fun.
